

Reverse String

Reverse words in Strings

hello world \rightarrow world Hello

Remove the extra spaces as well

"he per"

\downarrow rev [position]
"rep eh"

\downarrow rev individual [form]

"per he"

① Reverse the string
reverse(s.begin(), s.end())
for(i=0; i<n; i++)

String word = ""
while(i<n && s[i] != ' '){
word += s[i]
i++

}
reverse(word.begin(), word.end())

if(word.length() > 0)

ans += " " + word;

return ans.substr(1)

\uparrow
 \downarrow
X per he
