

# Populate Next Right : Pointer in each Node.

prev = NULL

Use Queue

If (prev != NULL)

prev->next = curr

prev = curr

Pseudocode

```

Node* connect(Node* root) {
    queue<Node*> q
    q.push(root)
    q.push(NULL)
    Node* prev = NULL
    while(q.size() > 0) {
        Node* curr = q.front()
        q.pop()
        if(curr == NULL) {
            return root
        }
        else {
            if(curr->left != NULL)
                q.push(curr->left)
            if(curr->right != NULL)
                q.push(curr->right)
            if(prev != NULL)
                prev->next = curr
            prev = curr
        }
    }
}
  
```
